

Product End of Life Notification – RadaScan Transponder and Series 1 Responder

27th March 2014

Dear Customer,

Following the discontinuation of the RadaScan transponder (Van Atta) and series 1 responder, please read the following official notification as record that we will cease to repair these products from 31st May 2014. Battery replacement kits for the transponder will still be made available.

Part Number	Name	Description
20-0071-1	Transponder (Van Atta)	
20-0103-1	Transponder (Van Atta)	with on/off switch
20-0108-1-X*-S1	Series 1 responder	Rechargeable
20-0110-1-X*	Series 1 responder	Non-Rechargeable *‘X’ indicates part revision

Replacement Model (subject to software version of the sensor).

[Series 2 responder \(http://marine.guidance.eu.com\)](http://marine.guidance.eu.com)

All the above targets can be replaced with series 2 responders at your earliest convenience. It should be noted that prior to replacement by a series 2 responder, the RadaScan sensor must be running software version 2.08 or higher.

For further assistance in determining your transition and upgrade options or any queries relating to this notification please contact your sales representative or alternatively a member of our Customer Services team.

Alternatively, you can refer to 94-0271-4-C RadaScan Series 2 Responder Buying Guide for further information.

Sincerely,

Craig Wallis
Customer Services Manager

PLEASE NOTE – This is an **important product notice** and should be reviewed by those individuals in your company directly involved with purchasing RadaScan, Mini RadaScan and peripherals such as targets.
