

Product End of Life Notification – RadaScan MK 1

21st February 2011

Dear Valued Customer,

Following the discontinuation of RadaScan MK 1 (P/N 20-0060-0)* in 2008 please read the following official notification of discontinuation of spares. Guidance will cease to make spares available by 31st December 2011, subject to the availability of parts. After this date we can no longer guarantee the continued supply of spares. Parts identified as end of life will be available for last time purchase up to this date prior to being made obsolete. Please note that this date may be earlier if critical parts are not available.

The decision to discontinue these parts is due to difficulties in sourcing obsolete major components that are integral to elements of the sensor.

Replacement Model

[RadaScan Microwave Position Reference Sensors](http://marine.guidance.eu.com) (<http://marine.guidance.eu.com>)

Guidance Marine offers a plug and play replacement in RadaScan MK 2 (P/N 10-0041-4)* or Mini-RadaScan (P/N 10-0130-4)*. A discounted upgrade package is available with an adaptor plate supplied for ease of installation. No cabling changes are required.

For further assistance in determining your transition and upgrade options or any queries relating to this notification please contact your sales representative, or alternatively a member of our Customer Services team.

Sincerely,

Craig Wallis
On behalf of Guidance Navigation Ltd

PLEASE NOTE – This is **an important product notice** and should be reviewed by those individuals in your company directly involved with purchasing RadaScan and all parts associated with the sensor.
